WORK EXPERIENCE

1) Ideal Software Solution. *(Software Developer - 2 Year)* **Solapur, Maharashtra**

I am working on the Min ERP module of the sugar factory. In this project, we used ASP.Net as frontend and MS SQL backend. This project was already in the desktop application. We had to work on this centralized the system into the server.

Responsibilities:

- Meet the end user and gather all the information, how the current application works and what improvements can be made to new software.
- Working on current software database into what are the requirement for centralized database. Discuss with tem member and design database and web pages.
- Testing the software by adding the current working date and checking whether everything is working properly.
- Training the end-user how it works and solve all system errors
- Reporting revision changes to the software to all team members.

Project Done:

- Min Enterprise resource planning of Sugar Factory.

2) Iconsys India. *(Software Developer – 1 Year)* **Solapur, Maharashtra**

In this company I was worked as vb.net developer. I had work on copal projected for Agro shop or Trading shops which are maintain sales to store into the software.

Responsibilities:

- Worked on new software projects and participated in the whole software development process from design to implementation and delivery
- Developed new software ensuring that clients' vision and requirements were met.

- Recognized by executives for completing projects in a timely manner and within budget
- Tested and updated existing software and using my own knowledge and expertise made improvement suggestions.
- Monitoring the effects of any changed code to see if it has affected the performance of any related software or systems.

Project Done:

- Agro Shop- Sales and store management system.
- Payroll Software.
- Website of EGO.
